National Garage
REMOTES & OPENERS

ATA KPX7v2
Programming Guide

ATA KPX7v2 Keypad

Door Code Button

Initial PIN Code Setup

1   Press and hold the FCN button. The keypad will beep and flash to indicate it is in learning mode. Release the button.
2   Enter your new 4-digit User Pin Code (E.g. 2640), then press FCN.
3   Re-enter the same 4-digit User Pin Code (E.g. 2640), then press FCN.
4   The keypad will beep and flash to indicate it is exiting learning mode.
WARNING - Do not lose your 4-digit pin! If you forget your PIN, you need to return the KPX7v2 to ATA for a factory reset.

Programming Your Keypad

1   Decide which channel you wish to use to operate the garage door with (Button 1 through 4).
2   Push and hold the door code button on your garage door opener. This is held until step 5.
3   Push and hold your chosen Channel (E.g. Button 1) for two seconds, then let go.
4   Push and hold your Channel (E.g. Button 1) for another two seconds, then let go
5   Release your channel button, then test the operation of your keypad by inputting your PIN code, then pressing the channel button (E.g. 26401)

Additional Codes & Changing A Code

Short cut Guide - Change User Pin

For technical support, see our website below.
Please have the model number of your remote control and garage / gate opener before calling.
